

Mr. Hariss Baraguir

Mr. Hariss Baraguir is a 31-year-old from Cotabato City, Philippines, who pursued a degree in Information Technology despite financial constraints. After graduation, he was diagnosed with thymoma and a rare disease affecting his tongue. He has been a member of the Philippine Patient Organization for Primary Immunodeficiencies (PhilPOPI) and requires regular IVIg treatment for his primary immunodeficiency. He is currently under the care of Dr. Maria Carmen Decena Ang at the Southern Philippines Medical Center in Davao City.
