

# IPOPI LATIN AMERICAN PID PATIENTS' MEETING

OCTOBER 19-20, 2023  
MEXICO CITY, MEXICO

an IPOPI event

ENCUENTRO DE IPOPI  
DE PACIENTES CON IDPS  
EN AMÉRICA LATINA

## Ms Gabriela Suarez Martinez

Gabriela Suarez Martinez is an Inhalation Technician. In 1998, after years of relapses, treatments and searching, she was diagnosed with primary, common variable immunodeficiency, at the age of 27. Derived from this, the concern arose to support more undiagnosed people with the same symptoms. Thanks to her academic knowledge and her desire to help, in 2005 she founded the Mexican Association of Patients with Primary Immunodeficiency's, AMPIP, with the help of mothers of patients with PID. Currently she continues to work and provide support to people with and without a diagnosis of PID.
