

## Mr Bruce Lim

Mr Lim is the Chairperson and co-founder of the Malaysian Patients' Organisation for Primary Immunodeficiencies (MYPOPI), and the Vice-President of IPOPI. He is also the owner of Modern Engineering Solutions Sdn. Bhd. in Malaysia. Bruce's personal connection to primary immunodeficiencies (PID), through his son who is affected with X-linked Agammaglobulinaemia, led him to establish MYPOPI in 2014. Since the start of MYPOPI, he has actively promoted PID awareness in Malaysia through media engagements, roadshows, and collaborations with medical associations. His commitment to the cause resulted in his roles within IPOPI, where he serves as a Vice-President, and previously as Treasurer.
