France

Connected Race

- This digital event gathered runners for the same week, all over the country, in order to raise awareness about PID.
- Their goal in 2022 was to bring together 450 participants to represent the 450 rare diseases of PIDs. Thanks to the mobilisation of members, volunteers and industrial partners this year, 720 participants ran, cycled, or walked to support patients from 22 to 29 April, and accumulated nearly 13,638 km. Learn more about this project [here](#).
